

## Test Your Login NOW!

---

### Your Production Database is Ready!

---

The admin user has been successfully created in your production database. Follow these steps to test the login:

---

### Step 1: Open Your App

---

#### Production URL:

`https://ccs-lead-agent-v2.vercel.app`

**Click here:** [CCS Lead Agent v2 - Login](https://ccs-lead-agent-v2.vercel.app) (`https://ccs-lead-agent-v2.vercel.app`)

---

### Step 2: Enter Login Credentials

---

#### Admin Credentials:

Email: dumi@ccsapparel.africa  
 Password: Dcs\_BD7@

#### Important Notes:

-  Password is **case-sensitive**
  -  Use the **exact password** above (including special characters)
  -  Email is all lowercase
- 

### Step 3: Click “Sign In”

---

The login should work immediately! You'll be redirected to the dashboard.

---

## Expected Result

---

After successful login, you should:

1.  See the dashboard page
  2.  See your name “Dumi Tshabalala” in the UI
  3.  Have ADMIN role access
  4.  Be able to navigate all features
-

# If Login Fails

---

## Quick Troubleshooting:

### 1. Check Credentials

- Make sure you copied the password exactly: `Dcs_BD7@`
- Verify the email is correct: `dumi@ccsapparel.africa`

### 2. Clear Browser Cache

- Press `Ctrl+Shift+Delete` (Windows) or `Cmd+Shift+Delete` (Mac)
- Clear cookies and cached files
- Try again

### 3. Try Incognito/Private Mode

- Open a new incognito window
- Go to the login page
- Try logging in again

### 4. Check Browser Console

- Press `F12` to open DevTools
- Go to **Console** tab
- Try logging in
- Look for any error messages
- Take a screenshot and share it

### 5. Check Network Tab

- Press `F12` to open DevTools
- Go to **Network** tab
- Try logging in
- Look for the `/api/auth/callback/credentials` request
- Check the response status (should be 200 OK)
- Take a screenshot if there's an error

# What Was Fixed

---

## Previous Issues:

1.  Password hash incompatibility (bcrypt vs bcryptjs)
2.  Production database not seeded
3.  Wrong password format in database

## Current Solution:

1.  Directly seeded production database
2.  Used bcryptjs (compatible with NextAuth)
3.  Verified password hash works
4.  Admin user properly configured

## Verification Details

---

### Database Information:

- **Database:** Neon PostgreSQL (Production)
- **Branch:** production (default)
- **Database Name:** neondb
- **User Count:** 2 users total

### Admin User Details:

- **User ID:** 0fefafa99d-479b-4872-b0f6-5c64b4fbcf7c
- **Email:** dumi@ccsapparel.africa
- **Name:** Dumi Tshabalala
- **Role:** ADMIN
- **Password:** Correctly hashed with bcryptjs
- **Verification:**  PASSED

### Vercel Deployment:

- **Status:** Ready (Latest: GjHuqb3TY)
  - **Build Time:** 36s
  - **Domains:**
    - <https://ccs-lead-agent-v2.vercel.app>
    - <https://ccs-lead-agent-v2-git-main-dumis-projects-6fa6c193.vercel.app>
    - <https://ccs-lead-agent-v2-2smja8bqf-dumis-projects-6fa6c193.vercel.app>
- 

## Need Help?

If login still doesn't work after trying all troubleshooting steps:

#### 1. Take screenshots of:

- The login page with credentials entered
- Browser console (F12 > Console tab)
- Network tab showing the auth request
- Any error messages

#### 2. Check Vercel logs:

- Go to Vercel dashboard
- Click on your project
- Go to "Deployments" tab
- Click on the latest deployment
- Check "Logs" for any errors

#### 3. Verify Environment Variables:

- Go to Vercel dashboard
- Project settings > Environment Variables
- Verify these are set:
  - DATABASE\_URL
  - NEXTAUTH\_URL

- NEXTAUTH\_SECRET
- 

## 🎯 Next Steps After Successful Login

---

Once login works, we can proceed with:

### 1. Phase 2: Lead Scoring System

- Implement lead scoring algorithm
- Add scoring dashboard
- Configure scoring parameters

### 2. Phase 3: Business Intelligence

- Add analytics dashboard
- Implement reporting features
- Set up data visualization

### 3. Phase 4: Integrations

- Connect to external APIs
- Set up email notifications
- Add CRM integration

### 4. Phase 5: Production Optimization

- Performance tuning
  - Security hardening
  - Monitoring setup
- 

## ✨ Success Message

---

Once login works, you'll see a message like:

 Welcome back, Dumi Tshabalala!

And you'll be redirected to the dashboard with full admin access.
